

Kaizen Idea Submission

Registration Number: 9012

Suggester: Udit Mishra (62334)

Category: Energy Efficiency

Description: Implementing automatic shutdown for idle machinery to reduce power consumption.

Problem Statement: High energy consumption in production line.

Before Kaizen:

After Kaizen:

Benefits: Expected energy savings of 15% per month.

Implementation Cost: 2000

Benefit-Cost Ratio: 5

Standardization: Will be documented in SOPs for all plants.

Horizontal Deployment: Similar implementation planned for other units.
